

ULTRALIGHT

Cos'è Ultralight

Ultralight è la lastra in alluminio ultra-sottile in grado di trasformare il mondo dei rivestimenti grazie alla sua incomparabile leggerezza, al trasporto agevole e all'installazione rapida e semplice. Grazie alle tecnologie di stampa ad altissima risoluzione, garantisce inoltre una qualità grafica superiore e offre infinite possibilità di personalizzazione del design.

Effetti 3D a rilievo, superfici matte e lucide, realizzate con un'innovativa stampa digitale a freddo su lastre in alluminio ultralegere. Il risultato è un prodotto unico, dove l'esperienza grafica e artistica di Tecnografica si unisce a un design di prodotto che introduce nuove possibilità nel settore. Oltre all'estetica, queste lastre hanno un reale impatto sui costi e sull'efficienza in cantiere: leggere, resistenti, facili da installare e da trasportare. Sono ideali per superare le problematiche legate ai materiali più fragili e pesanti.

What is Ultralight?

Ultralight is the ultra-thin aluminum slab that can transform the world of wallcoverings with its unmatched lightness, effortless transportation, and quick and easy installation. Thanks to the very high-resolution printing technologies, it also guarantees superior graphic quality and endless design customization possibilities.

3D relief effects, matte and glossy surfaces, created using innovative cold-process digital printing on ultra-thin aluminum slabs. The result is a unique product, where Tecnografica's graphic and artistic expertise merges with product design that introduces new possibilities in the industry. Beyond aesthetics, these slabs make a real impact on construction costs and efficiency: lightweight, durable, easy to install and transport. They are ideal for overcoming issues related to heavier and more fragile materials.

only 1.2 mm thick

Light and ultra-thin

Easy to handle

Easy to work

Extremely Thin Thickness

With a thickness of around 1 mm, Ultralight offers unmatched lightness and flexibility, making it easy to handle and install in any project.

Reduced Ecological Impact

Production with no gas emissions.

Logistics and Installation

Reduced costs due to the product's light weight, facilitating truck transport within Europe and container shipping to markets like the United States.

Space Efficiency

Lightweight and thin, the product simplifies transportation and installation, eliminating the need for bulky packaging like A-Frames, allowing horizontal stacking in boxes with minimal space.

Ultra-High-Resolution Digital Printing

Images are reproduced with extreme clarity and quality, thanks to advanced digital printing technologies.

Durability and Resistance

Despite its lightness, Ultralight offers exceptional resistance to wear and weather conditions, making it perfect for both interior and exterior cladding applications.

Spessore Estremamente Ridotto: Con uno spessore di circa 1 mm, Ultralight garantisce una leggerezza e flessibilità uniche, rendendo il prodotto facile da maneggiare e installare in qualsiasi progetto. **Impatto Ecologico Ridotto:** Produzione senza emissioni di gas. **Logistica e Installazione:** Costi ridotti grazie alla leggerezza del prodotto, che facilita il trasporto su camion in Europa e il trasporto via container verso mercati come gli Stati Uniti. **Risparmio di spazio ed efficienza:** Leggero e sottile, il prodotto semplifica il trasporto e l'installazione, eliminando la necessità di imballaggi ingombranti come gli A-Frames, con disposizione orizzontale in scatole e minimo spazio. **Stampa Digitale ad Altissima Risoluzione:** Le immagini sono riprodotte con estrema chiarezza e qualità, grazie alle avanzate tecnologie di stampa digitale. **Durabilità e Resistenza:** Nonostante la sua leggerezza, Ultralight offre un'eccezionale resistenza all'usura e alle condizioni atmosferiche, rendendolo perfetto per applicazioni di rivestimento sia interne che esterne.

Three sizes

All designs available

Three finishes

ULTRALIGHT

super glossy

- Mirror-like glossy finish that enhances the elegance of marble, onyx, and precious stones.
- Ideal for luxurious spaces, especially in the naval and hospitality sectors.
- Effortless installation due to the lightweight slabs, eliminating the need for extensive pre-work.

- Finitura lucida effetto specchio che esalta l'eleganza di marmi, onici e pietre preziose.
- Ideale per spazi lussuosi, in particolare nei settori navale e hospitality.
- Installazione facilitata grazie alla leggerezza delle lastre, senza necessità di grandi preparativi.

ULTRALIGHT

3D

- Three-dimensional surface that seamlessly integrates texture and graphics.
- Vivid colors and sharp details thanks to an extensive RGB color gamut.
- Ideal for realistic textures like concrete, wood, stone, and fabrics.
- Enhances surfaces with tactile details, perfect for interior design and decorative applications.

- Superficie tridimensionale che integra perfettamente texture e grafica.
- Colori vividi e dettagli nitidi grazie a un ampio gamut cromatico RGB.
- Ideale per texture realistiche come cemento, legno, pietra e tessuti.
- Esalta le superfici con dettagli tattili, perfetto per il design d'interni e applicazioni decorative.

ULTRALIGHT

matte

- Matte satin finish that reproduces the tactile elegance of marble and smooth stones.
- Exceptionally sharp details, perfect for reproducing a wide range of designs.
- Ideal for creating sophisticated and natural effects in various indoor environments.

- Finitura satinata opaca che riproduce l'eleganza tattile dei marmi e delle pietre lisce.
- Dettagli eccezionalmente nitidi, perfetti per riprodurre un'ampia gamma di design.
- Ideale per creare effetti sofisticati e naturali in vari ambienti interni.
